City Council Meetings Now Streaming Live on the Internet

Wichita Falls, TX- Citizens who do not have cable, who use the Dish Network or who would enjoy the convenience of viewing City Council meetings at any time can now watch the live broadcast or a recorded version through the City's website. The first live web streaming of City Council meetings will begin Tuesday, September 6th at 8:30am. The new streaming system was tested during an August 16th Council meeting and proved successful.

"We want to provide the citizens of Wichita Falls with every tool to view the important discussions that occur and decisions that are made during Council meetings," said, Barry Levy, City of Wichita Falls Public Information Officer. "Web streaming has been a consistent request we've received for some time and we're very pleased to be able to provide this service. The citizens asked and we were glad to respond," said Levy.

To view a meeting simply go to the City's websites at wichitafallstx.gov, go to the Media Center located in the upper left-hand column of the homepage and click on the "channel" that says "LIVE." The Media Center will also store the video until the next Council meeting to allow citizens to view the recorded program at any time.

Only meetings held in the City Council Chambers located in Municipal Auditorium will be streamed live on the internet. For more information please contact the Wichita Falls Public Information Office at 761-7401.
